

Ethernet Cable

Part # L5-NET MSRP \$79

Easily Connect iPhone or iPad to Ethernet

The Redpark Ethernet Cable connects iPads and iPhones to ethernet networks or devices.

The cable is instantly recognized by iOS as a network connection. The ethernet connection is available for use by any iOS app and can be configured using the Settings app on the iOS device when running iOS 10 (or later).

The cable supports 10/100 networking and provides bandwidth up to 95 Mbps depending upon the iOS device being used.

Use Cases

Field Service: Enables field technicians to forgo laptops and instead use an iPhone or iPad to configure or troubleshoot ethernet devices in the field.

Wi-Fi Prohibited: Provides a secure network connection in commercial, military or medical facilities where Wi-Fi is prohibited.

Wi-Fi Weak or Unavailable: Delivers a reliable wired network connection in an instance where Wi-Fi is weak or unavailable.
